01 MARKET GROWTH FORECAST (2024–2033)

Source: Dataintelo AI-Generated Travel Itinerary Market Report 2033. CAGR of 18.7% sustained across 9-year forecast period.

02 REGIONAL MARKET SHARE (2024)

North America leads driven by high technology adoption. Asia Pacific is the fastest-growing region at a projected CAGR of 22.3% (2025–2033). Sources: Dataintelo, Precedence Research.

03 CONSUMER DEMAND SIGNALS

Stat	Finding	Source
#1 AI use case	Generating trip itineraries ranked as the top AI feature used by travellers globally	Statista 2025
78%	Of travellers say generative AI has already improved how they plan and book trips	Pricerights 2025
90%	Of travellers are now aware that AI can help with trip planning	Travo 2026
52%	Of travel & hospitality marketers plan AI personalisation investment by end of 2025	Skift 2025
45%	Funding for AI travel startups (up from 10% in 2023)	McKinsey 2025

04 COMPETITIVE LANDSCAPE

Tool	Strength	Weakness	Pricing
Layla AI	Best overall — conversational, context-aware	Limited export options	Free tier + paid
Mindtrip	Map-first visual; great for visual planners	Cluttered on mobile	Freemium
Roam Around	Fast, simple itinerary outlines; free	Surface-level personalisation	Free
Wonderplan	Budget-focused allocation across trip	Limited beyond budget planning	Free
GuideGeek	WhatsApp chatbot — no app needed	Lacks itinerary export	Free
ChatGPT plugins	Flexible natural queries; Expedia/Kayak/Kayak	No native itinerary builder/PDF	Per-plan or subscription

05 MARKET OPPORTUNITIES

PDF Export Gap

Most competitors generate itineraries on-screen only. A clean, downloadable PDF is a meaningful differentiator — especially for travel agencies, corporate teams, and travellers who want offline access.

Asia Pacific Growth

APAC is growing at 22.3% CAGR with a \$340M market base in 2024. India is a particularly strong opportunity with rising disposable income and tech-savvy travellers.

B2B Travel Agency Vertical

Corporate and agency clients need branded, shareable itinerary PDFs to send to clients. This segment is significantly underserved by current consumer-focused tools.

Hyper-Personalisation

52% of travel marketers plan AI personalisation investment by end of 2025. Tools that learn from user preferences and past trips are gaining a clear competitive advantage.

06 STRATEGIC RECOMMENDATION

The AI travel itinerary chatbot + PDF export concept is well-positioned in a high-growth market. The \$1.34B segment is expanding at 18.7% CAGR, consumer demand is at an all-time high, and the PDF export gap remains unaddressed by major competitors. A chatbot that converses naturally to build an itinerary and then delivers a beautifully formatted, shareable PDF addresses a real and unsolved pain point — particularly for travel agencies, corporate users, and the fast-growing APAC market.
